Professional Summary

Computer Science Graduate and aspiring AI Engineer with strong experience in machine learning, AI, Data Science, natural language processing, and full-stack web development. Skilled in building intelligent systems including ML models, recommendation systems, and AI-powered chatbots. Experienced with tools such as Python, TensorFlow, PyTorch, Scikit-learn, LangChain, LangGraph and FastApi for developing real-world AI applications.

Core ICT Skills

Systems: Windows, Linux Basics, Software Installation

Networking: LAN/WAN, WiFi, Network Troubleshooting

Support: Incident Handling, Debugging, User Support

Hardware: Peripherals, Device Setup, Maintenance

Documentation: MS Word, MS Excel, Technical Reporting

Operations: APIs, Monitoring, Performance Optimization

Professional Experience

RegexByte IT Solutions

AI Engineer Intern

2025–Present

- Developed and implemented machine learning models for predictive analytics and intelligent decision-making using Python, Scikit-learn, and TensorFlow.
- Built AI-powered applications including chatbots and NLP-based systems utilizing frameworks such as LangChain and Hugging Face Transformers.
- Designed and optimized data processing pipelines for structured and unstructured datasets, improving model training efficiency and performance.
- Conducted model evaluation, hyperparameter tuning, and performance analysis to enhance prediction accuracy and system reliability.
- Collaborated with development teams to integrate machine learning models into real-world software applications and AI-driven tools.

National Center of Artificial Intelligence, UET Peshawar

Peshawar, Pakistan

Artificial Intelligence Intern

Sep 2025 – Dec 2025

- Contributed to the complete AI development lifecycle including data preprocessing, model development, and performance evaluation.
- Worked on fine-tuning large language models using prompt engineering techniques.
- Developed Retrieval-Augmented Generation (RAG) agents and AI automation systems for intelligent information retrieval.
- Assisted in building AI agents capable of automating workflows and interacting with structured data sources.

Elevvo Pathways (Remote)

Cairo, Egypt

Machine Learning Intern

Aug 2025 – Sep 2025

- Performed data preprocessing, feature engineering, and model training using Python, Pandas, and Scikit-learn.
- Applied machine learning algorithms including Logistic Regression, Decision Trees, and K-Means for predictive analysis.
- Worked with real-world datasets to identify patterns and build predictive models.
- Visualized results and documented insights to support data-driven decision making.

Relevant Technical Projects

Heart Disease Prediction using Machine Learning

- Developed a machine learning model to predict heart disease risk using clinical patient data from the Kaggle heart dataset.
- Implemented data preprocessing, feature selection, and model training using algorithms such as Logistic Regression, Random Forest, and Support Vector Machines.
- Evaluated model performance using accuracy, precision, recall, and ROC-AUC metrics to ensure reliable predictions.

AI Chatbot with Tools and Persistent Memory

- Developed an intelligent chatbot using LangChain, LangGraph, and Streamlit supporting conversation threads and tool usage.
- Implemented persistent memory and dynamic tool integration to perform tasks such as document analysis and information retrieval.
- Designed the system architecture to simulate a ChatGPT-like conversational AI experience.

Recommendation System using TensorFlow

- Built a recommendation engine using collaborative filtering techniques to suggest relevant items to users.
- Implemented the model using TensorFlow and optimized training through feature engineering and data preprocessing.
- Evaluated recommendation accuracy and improved system performance through model tuning.

Education

Government Post Graduate College, Mardan

Bachelor's in Computer Science

2021–2025

Certifications

Get Started with Python: Google / Coursera, 2025

The Power of Statistics: Google / Coursera, 2025

Foundations of Data Science: Google / Coursera, 2025

Go Beyond Numbers: Translate Data Into Insights: Google / Coursera, 2025

The Nuts And Bolts of Machine Learning: Google / Coursera, 2025

Regression Analysis: Simplify Complex Data Relationship: Google / Coursera, 2025
